

Frozen Pool: Exciting new – FREE – tools have arrived!

As the leader in fantasy hockey innovation, DobberHockey's Frozen Pool has introduced another great tool – FREE to everyone. In addition, some popular tools have been moved from the members section and made available to the public for free.

First, the new free tool ...

This is a “newsfeed” covering Fantasy Hockey. It's a bullet list of player info that gives you the lowdown on a player, hyperlinked to the source. Injuries, scratches, streaks and more all at your fingertips. Each line links to the player's DobberHockey profile (more on this below), as well as the “Tweet” or the news item that it was found. Find the new tool via the navigation menu up top under “Free Features”, or by just going to the Frozen Pool section. Here's a screen shot:

Fantasy News			
INJURY STREAK TRANSACTION NEWS ALL			
Player	Type	Description	Date Posted
ELIAS, PATRIK	STREAK	Elias' point streak was stopped at seven games on Saturday	2012-01-22 13:31:10

BRASSARD	NEWS	Brassard finished up Saturday's game on a line with Gillies and	2012-01-22

Secondly, we have moved some tools into the free section. *These now 'free' tools are:*

1. Quick Reports – Line Combos – Last Game

This gives you, with a quick click of the team, the precise line combos by percentage of their shifts together, during the team's last game.

2. Quick Reports – Line Combos – Last 3 Games

Same as above, but for the last three games.

3. Player Fantasy Profiles

If you select a player, this tool will give you his stats over the last several games, as well as line combo information and a chart graphing his ice time.

On top of this, we still have enough value and innovation to make a purchase of the rest of the tools still worthwhile. A membership at Frozen Pool gives you access to the following tools:

1. REAL TIME line combos. That's right. A game going on right now? Get in there and check out the lines that have been put together so far.
2. CUSTOM dated line combos. Any year going back six years, any start date through any end date.
3. LINE PRODUCTION. How did a player do playing with certain players? Who is he the most/least productive playing with?
4. GAME PLANNER. Do not make your pro-line picks without consulting this bit of genius.
5. FANTASY MANAGER. Track your entire team, track several of your teams – the full stats line on all your guys.
6. LINE MATCHUPS. Who does the team put out there to defend against Evgeni Malkin? Which player faces the easier opposition – David Krejci or Patrice Bergeron? Questions answered with this amazing tool.
7. COMPARE-A-PLAYER/COMPARE-A-GOALIE. Forty-one categories to compare. Side-by-side.
8. REPORT GENERATOR, ROTO RANKER, ROTO RATER, TOP FORWARDS (WEEK), TOP FORWARDS (MONTH), TOP DEFENSEMEN (WEEK/MONTH), and so much more. Any stat, any range of dates, broken down by team, position or league-wide.

The bottom line is – we want to arm every reader with all the ammo they need to win their fantasy league. DobberHockey also believes in a free internet. If we charge for something, we want to be able to give a tangible (and valuable) return. Sometimes it's difficult to balance that with an effective means of supporting costs. But whatever readers decide to spend to support the Dobber Sports Network, whether it's zero dollars or the \$58.99 needed to buy every single tool that the DSN has to offer each year – they will get more than their money's worth. Consider it a guarantee.
